Business and IT Management Professional

Accomplished Telecommunications and IT Management professional with over 18 years of progressive experience in operations and product delivery across various departments. Proven expertise in leading multi-disciplinary teams, optimizing processes, and consistently delivering projects on time and within budget. Recently earned a certificate in Data Science and Machine Learning from MIT, with specialized knowledge in predictive analytics, recommendation systems, and deep learning. Seeking to leverage my strong analytical, problem-solving, and leadership skills to transition into a role focused on data-driven decision-making and analytics, where I can contribute to innovative projects and further develop my expertise in working with data.

WORK EXPERIENCE**ATT, Operations Systems Technician****July 2012 - present****Systems Technician**

Business Telecommunications Product Delivery, Software and Hardware Maintenance, and Logistics Design

- Complete comprehensive site surveys to kickstart project execution and finalize reviews of engineering, design, and logistics for all project deliverables prior to installation and signoff.
- Oversee local implementation of company projects, resulting in cost reduction by internalizing work and eliminating external contractors.
- Conduct in-depth cost analyses for intricate installation projects and delivered detailed assessment reports.
- Contribute as a member of the Tech Innovations and PMEI Team, collaborating with division directors to identify and propose solutions for operational challenges, leading to the removal of obstacles hindering union employees' success.
- Spearhead reengineering of last leg network architecture to improving system reliability, Territory repair frequency reduced by 80% over the last 5 years.
- Collaborate with local engineers to streamline new job issuance for field problem resolution, optimizing client service delivery.
- Organize and lead cross-functional teams for short-term projects focusing on system upgrades, contributing to enhanced customer experience and operational efficiency.
- Functioned as a next level managerial backup, honing leadership skills and contributing to team management and strategic planning.
- Install and maintain all fiber, pots, VOIP, managed services and telecommunications projects including b2b client relations.
